## DETAILED ACTION

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1 and 2, in the “marking” step, it is not clear if the term “last” modifies the verb “marking” or the noun “said at least one port”. Thus, it is not clear if the marking is done last, or if it is the last one of at least one port that is marked, or something else?

In claim 1, line 2 and line 7, it is not clear what is meant by “senior border” – does it mean senior border node?

In claim 2, the claim seems incomplete – it seems that a page is missing.

### ***Double Patenting***

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422

Art Unit: 2663

F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-2 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-2 of copending Application No. 10/635,749, and also over claim 1 of copending application 10/635,593. Although the conflicting claims are not identical, they are not patentably distinct from each other because although the present claims recite the term 'B PHY', this term is referring to P1394b compatible node, and can be readily related to the 'border node' of the '749 application and the 'node' of the '593 application. The claims in the present application and the copending applications are all directed to determining a path to a senior border node including a determining step and a marking step, which as a whole claims methods of determining a path to a senior border node. Claim 1 of '593 application recites a method for identifying a senior border node rather than a path determination to a senior border node. However, the difference is only in that the claim is recited from the actual senior border node's perspective whereas the '749 is recited from a regular border node's perspective, and the '836 is recited from a B node's perspective.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
